---

Mickey:

See attached spreadsheet.

Wanted to see what else you may have. What information do you have to complete the table.

1. It is my understanding that the Frac Tank Analytical is no longer good since it was all previously disposed and there is no recent data from the;
2. Is VB633 listed as VB6026 on the analytical?
3. Confused about AST South Tank Farm – IDs on the diagram show OT11 – 18 while the table shows QT1-8. How do these correlate.
4. Confused about the how the samples taken for the Wastewater Treatment Plant correlate with the tanks.

Thanks
